

10) employee class with properties:

using system;

class Employee

{

public int Id {get; set;}

public string name {get; set;}

public double salary {get; set;}

}

class program

{

static void main()

{

Employee emp = new Employee();

emp.Id = 101;

emp.name = "Dinesh";

emp.salary = 25000;

console.WriteLine("ID:" + emp.Id);

console.WriteLine("name:" + emp.name);

console.WriteLine("salary:" + emp.salary);

}

}

output:

ID: 101

name: Dinesh

Salary: 25000

2) student class with Indexer

using system;

using system.collections.Generic;

class student

{

private Dictionary<string, int> marks =

new Dictionary<string, int>();

public int this [string subject]

{

get

{

return marks [subject]

}

set

{

marks [subject] = value;

}

}

}

class Program

{

static void main ()

{

```
student student = new Student();
```

```
student["maths"] = 90;
```

```
student["science"] = 85;
```

```
student["English"] = 75;
```

```
Console.WriteLine(student["maths"]);
```

```
Console.WriteLine(student["science"]);
```

```
Console.WriteLine(student["English"]);
```

```
}
```

```
}
```

Output

maths : 90

science : 85

English : 88
