

task - 1static field example :

using system;

class counter

{
 public static int count = 0;

public counter ()

 {
 count ++;
 }

}

class program

{
 static void main ()

{

counter c1 = new counter ();

counter c2 = new counter ();

counter c3 = new counter ();

counter c4 = new counter ();

Console.WriteLine ("Total objects created : +

counter.count);

}

Task - 2

static method

using system;

class Maths

{

public static int Add (int a, int b)

{

return a+b;

}

}

class Program

{

static void main ()

{

int result = Maths.Add (10, 20);

console.WriteLine ("sum = " + result);

Task - 3

static class

using system;

static class Calculator

{

public static int Multiply (int a, int b)

```
{  
    return a * b;
```

```
}
```

```
}
```

class program

```
{
```

```
    static void main ()
```

```
{
```

```
    int result = Calculator.multiply(5, 4);
```

```
    Console.WriteLine("multiplication = " + result);
```
